

Please note that Graffiti Solutions is on

masterspec

The following substrate/appearance particular specifications are available from our web-site in a downloadable format.

They are set out in a Word Document format to enable cut and paste of relevant information.

These cover the most commonly used substrates.

If you require a solution outside of this scope, please contact us to discuss the best options.

Regardless, we strongly recommend that you discuss every project with us first-hand and before-hand as there are many intervening variables in the selection of a system and we may be able to offer a more suitable alternative. Also, some substrates cannot (or don't need to) be protected against graffiti attack and we can alert you to this fact early on.

TESTING RESULTS and ANTI GRAFFITI CERTIFICATION

Summary of tests for a number of Pertinent Values such as VOCs, Water Vapour Permeability, Weathering Resistance, Anti-Carbonation, Water Vapour Transmission et al are available upon request to:
