FREE YOURSELF FROM THE HASSLE OF GRAFFITI CLEAN-UP

For more than 20 years Graffiti Solutions has been dedicated to keeping New Zealand free of graffiti. We are New Zealand's leading graffiti management company specialising in graffiti prevention through management plans, graffiti protection coatings and graffiti removal.

We guarantee long-term quality results. For nearly a quarter of a century we have been keeping Auckland's Motorway Network free of graffiti.

GRAFFITI VANDALISM CONTROL

Graffiti Solutions offers complete Graffiti Management programmes including advice, protection and removals. We pride ourselves on "taking ownership" of graffiti on large public spaces which are prime targets for vandalism. Ask about our Graffiti-Free Guarantee insurance policy which gives surety of costs and peace of mind.

PROTECTIVE COATINGS

Pre-empt vandal strike on vulnerable areas with time-proven, long-lasting, warranted systems. We are the sole NZ agents for leading Guardian Systems that have been successfully protecting NZ assets for over 25 years. Talk to us, and whatever the substrate, we will have experience & knowledge to share and a proven system to offer.

RESTORATION & REMEDIAL SOLUTIONS

Graffiti Solutions own the renowned Reeson product range. Reeson has been developed by NZ chemists especially for use on heritage assets. We have extensive experience in restoring historic surfaces to their original state.

SOLUTIONS FOR GLASS & ACRYLIC SUBSTRATES

Glass, Acrylic & Polycarbonate protection. Our sister company, GSL Glassguard, specialises in all manner of glass protection. Glass-etch protection films; Printable, graphic graffiti protection films; Safety Films; Solar Films; Blinds.

GRAFFITI PROTECTION, GRAFFITI REMOVAL & AESTHETIC WORK

GRAFFITI SOLUTIONS

At Graffiti Solutions Ltd, we provide a full graffiti protection, graffiti removal and graffiti management service for commercial buildings and infrastructure assets.

As New Zealand's leading graffiti control and graffiti removal company, we oversee the graffiti management of some of our country's largest organisations and companies including NZTA, Auckland Transport (AT), Fulton Hogan, Downer, Fletchers, Newmarket Business Association, University of Auckland and various City and District Councils.

We work on large public spaces so our technologies and methodologies must stand up to public scrutiny at the highest level. We offer a Premium service throughout New Zealand.

As coatings specialists, we also offer Restoration and Remedial Services and systems. Graffiti Solutions is highly experienced in the cleaning, removal and control of biological growth, removal of old coatings and reinstatement of protective coatings.

Our quality workmanship is unmatched...our range of systems unrivalled.

GRAFFITI VANDALISM CONTROL

As New Zealand's leading Graffiti Management company we have extensive years' experience in identifying graffiti hot-spots and how best to strategically manage them in the most cost-effective, environmentally friendly, and proficient way.

Commercial buildings and public spaces need to be accessible to the community, thus leaving them open to graffiti vandalism. Sports grounds, arenas, car parks, schools, motorways, rail corridors, train stations, bus shelters and the like are all particularly vulnerable. We initially consider the following options as deterrents to graffiti crime – Access Denial, Vegetation Screening, Lighting and Security. Should these options not be practicable, protection for the vulnerable surfaces such as fences, walls and glass may be required.

We can visit your site and make recommendations for the best long-term solutions to graffiti vandalism.

These recommendations may include any of the mentioned deterrents or a combination of options including anti-graffiti coatings. There are specialised systems designed to protect all manner of substrates and glass from graffiti vandalism. In the case of substrates, these coatings may be permanent or sacrificial.

Guardian Anti-Graffiti Coating can be pigmented to match any colour, or as a clear coat. It is permanent and can withstand many attacks.

For use on porous surfaces Guardian Graffiti Shield is a highly unobtrusive, sacrificial coating that is removed with steam and then reapplied to the affected area. It is water-vapour transmissible (breathable) and ideal for instances where moisture needs to egress the substrate.

Glass-etch protection is a sacrificial film that can be replaced once badly etched. Security laminate films are sacrificial once they have been breached.

GRAFFITI FREE GUARANTEE

FREE YOURSELF FROM THE HASSLE OF GRAFFITI CLEAN-UP

Graffiti Solutions provides a Graffiti-Free Guarantee under which we take ownership of the graffiti problem. This service takes all the hassle away from the property manager or owner and provides certainty of cost.

We guarantee to keep the property free of graffiti for a yearly fee. The graffiti will be removed within 24 hours and there is no limit to the number of graffiti attacks we will remove.

Graffiti-Free Guarantees are customised to your needs and can be proactive or reactive.

COMMONLY USED GRAFFITI PROTECTION SYSTEMS

We only use the best, proven systems sourced world-wide from specialist manufacturers. Utilising the most cost-effective method for each situation, we recommend different methods of protection for each asset based on a risk/frequency equation and the specific substrate characteristics.

We have a range of proven anti-graffiti systems from different suppliers around the world and access to a specialist coatings research and development laboratory.

Failures of graffiti protection are frequently a result of inappropriate system selection and application.

Examples of our two most-widely used graffiti protection systems are below:

GUARDIAN GRAFFITI SHIELD

Guardian Graffiti Shield is a high-quality sacrificial protective coating. It provides unobtrusive protection for stone, brick and concrete surfaces while allowing the egress of moisture and salts.

APPLICATIONS

Suitable for porous surfaces including:

- Natural Stone
- StoneStrong, Keystone, Allan Block
- Clay Brick and Tile
- Selected Fibre Cement Board Systems
- Concrete Block, Coloured, Honed or Natural

FEATURES

- Remains effective for over ten years
- Quick drying time means almost immediate graffiti resistance
- Highly unobtrusive
- Allows water-vapour transmission
- UV resistant; non-yellowing
- Environmentally friendly
- Water repellent
- Reduces absorption of pollutants by porous surfaces
- Clear, matt finish
- Graffiti removal using low-pressure hot water
- Ten-year warranty

GUARDIAN ANTI GRAFFITI COATINGS

Guardian Anti-Graffiti coatings are permanent (non-sacrificial) coatings which offer long-term protection from graffiti and environmental damage. Numerous removals of graffiti over a period of years will not damage the protective coating or the underlying substrate.

APPLICATIONS

Guardian Anti-Graffiti Coatings are suitable for most non-porous surfaces, including:

- Painted surfaces, including painted concrete
- Plastics / Metal / Vinyl
- Wood
- Signs / Banners
- Can be used in place of paint, proving to be a significant benefit and cost saving.

FEATURES

- Permanent coatings
- Quick drying time means almost immediate graffiti resistance
- Available in 2000 colours, or clear
- Exceedingly resistant to graffiti and solvents
- UV resistant; non-yellowing
- Abrasion, chemical, mould and salt-air resistant
- Anti-carbonation certified
- ISO 9002 manufactured
- Gloss, satin or matt finishes
- Easy and quick graffiti removal using Guardian Graffiti remover
- Durable coating allows for multiple removals over many years
- Simple cleaning of mould and pollution

RESTORATION & RECTIFICATION OF HERITAGE AND OTHER ASSETS

Regular repair and maintenance of historic buildings is important to maintaining heritage values and should be encouraged.

As well-established restoration and specialist coatings applicators in New Zealand, Graffiti Solutions have substantial experience, technology and skills to draw on. Generally, repair work will involve replacing existing substrates with a similar new material.

Consequently, Heritage Restoration is very specialised work and knowledge of specific substrate behaviour is pivotal to selecting the correct methodologies used to restore, protect and maintain it.

Over the years, our Heritage Division has been an Expert Heritage Consultant to main contractors, architects and councils – delivering best outcomes in remedial and restoration work across many projects.

CLEANING AND REMEDIAL WORKS TO CONCRETE AND OTHER POROUS SUBSTRATES

As coatings specialists, Graffiti Solutions have turned their talents to rectification of aesthetically-flawed surfaces. The visual, reputational and financial ramifications of aesthetically-poor surfaces can be huge.

Graffiti Solutions has extensive experience in the cleaning and sealing of concrete, plaster, brick and natural stone.

For example:

- Rust stains
- Construction damage
- Site contamination
- Environmental damage

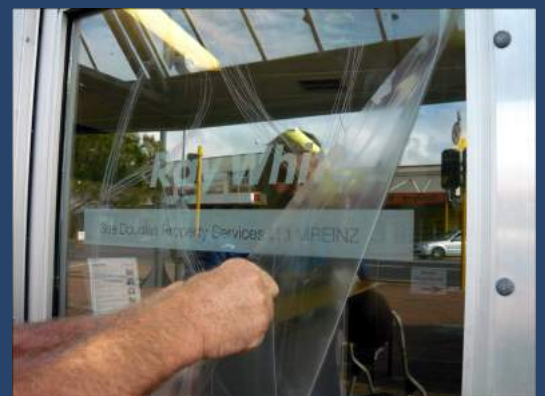

GSL GLASSGUARD LTD ARE LEADERS IN THE PROTECTION OF GLASS, POLYCARBONATES AND ACRYLICS FROM GRAFFITI ETCHING, FORCED ENTRY AND SOLAR PROTECTION.

GSL Glassguard operates under the umbrella of Graffiti Solutions' proven Health & Safety, Quality, and Environmental systems, but specialises in the protection of glass, polycarbonates and acrylics from graffiti etching, vandalism and breakage.

GSL Glassguard specialises in the specification, provision and application of:

- Etching and graffiti protection films
- Printable graphic films
- Existing scratch removal or minimisation
- Shatter control for safety
- Security window laminates
- Solar Protection films
- Blinds and sunscreens
